PROJECTS
Get me help
The existing system is direct approach to the workshop and solves our vehicles problems.
This system is old and has some difficulties.
So we introduce our new system.
Advantages:
Less Manual efforts
Efficient syste
Helps the growth of tourism
Time efficient system

Derm-assist
There are many skin diseases including skin cancer, eczema, allergies. The focus of this project will be of two types of most common dermatological, where the image will be taken either directly from the mobile camera or choose it from database and then analyzes the image and isolate the skin area and extract the affected area.
The admin module administrates thesystem and the prediction of the skin disease is done by the users
